

QuiltNebraska 2009

TAM01 (Thursday morning) or

FAM38 (Friday morning)

Leslie Main

TO LONG ARM OR NOT, THAT IS THE QUESTION!

All Levels

Wondering if “long arm” machine quilting is for you? Come play as we test drive a Handiquilter machine. Explore the basics of long arm quilting and what features to look for in a machine. We will review all the basics of loading, maintenance, threads, tension and pattern applications as we quilt a simple wallhanging and play with a few quilting techniques you may not have thought about doing with a long arm machine. 10 machines will be set up for this class – no more than two students per machine.

Supplies:

Pencil and pad of paper for notes

Scissors for clipping threads

Pins and pincushion

Kit Fee: \$10.00

Kit includes a spool of quilting thread, a pre-wound M class bobbin, pieced quilt top, backing and batting.
